

10 Advantages of Zim-Mixers

1. The driving force within the mobile volumetric concrete industry for more than 50 years.
2. Produce fresh concrete in a continuous stream, rather than as a batch.
3. Can produce any quantity of concrete over just 1 cubic yard, eliminating waste and overruns.
4. Production starts on-site and on-demand, and can even be intermittent.
5. Custom blended concrete, so many different mixes can be produced fresh on the same delivery run.
6. A numbered dial plate makes mix design changes the fastest in the industry.
7. No cement build-up in the mixing system, giving more consistent material flow and a better mix.
8. Positive feed delivery system moves the same amount of material from the beginning to the end of a load, ensuring quality and consistency .
9. Meets American Society for Testing and Materials (ATSM) Code C-685 with amazing accuracy.
10. Volumetric Mixer Manufacturers Bureau (VMMB) approved, ensuring the mixer will produce the stated yardage of quality concrete.
